

# LET'S TALK ABOUT WOMEN'S HEART HEALTH

**Attention:**

## **Women at risk for coronary heart disease**

Do *you* want to hear about and give feedback on a cardiac research project that is specifically for women and happening right now?

Please register to participate in this Community Engagement Studio (meeting). Compensation is \$45. See more below.

**Date:** May 23, 2023

**Time:** 6:00pm-7:30pm

**Location:** Online via Zoom  
**Information/registration:**

krismiller@virginia.edu or

### **You are at risk for coronary heart disease if you have been diagnosed with:**

- Diabetes (I or II)
- High Blood Pressure
- High Cholesterol
- Being a Former Smoker
- Obesity
- Inactivity
- Preeclampsia
- Gestational Diabetes

A Community Engagement Studio is a round table discussion between researchers and a small group of 8-10 community members (who have experience with the research topic (ex. heart disease)).

The researchers present their research study and then ask the community members 3-4 questions, to help improve their project.

The Studio is NOT research. It lasts for about 1 ½ hours. It will be done by Zoom, so anyone with a phone or computer can join.
